

Interacting with the LGBT Community

- How do we react when we see a couple together?
- What do we think?
- Are we welcoming and inclusive?
- Are there any limitations to our conversation or our manner?
- What 'filter' do we apply?

What labels are used in society?

- We normally use male or female or 'normal' but this is based upon living 'in our heteronormative society'
- If the heterosexual population makes up 95%
   of the population, it may be 'natural' to say
   that the majority are 'normal' but is it?
